

NEW PVD TECHNOLOGY

PVD stands for "Physical Vapour Deposition". PVD surface treatment technology for belatec products is equivalent to that used for casings and metal bracelets in the watchmaking industry. It is one of the most modern and environmentally-friendly treatment procedures that exist.

Discover few photos of the PVD process...

This type of covering is highly resistant to wear and tear and scratching. The essential qualities of a PVD surface treatment are hardness and durability, meeting the specifications of our high end belatec products.
